Number 46

Oppose Compulsory Insurance on Cars

Adoption of compulsory car insurance is not viewed favorably by the Alberta government. This was stated recently in the legislature by Premier Manning, when replying to an opposition question.

Mr. Manning said the scheme was not favored by the provincial government because of its compulsory nature. He believes there were other approaches to the subject and these were being studied by the provincial authorities.

In view of the compulsory insurance plans adopted in Manitoba and Saskatchewan, there has been keen interest in the course to be followed in Alberta.

Officials of the Alberta Motor Association say they are watching the situation and intend to give careful study to any plan put forward in this province. It is not expected that the provincial government will take any action along this line in the present year.

The A.M.A. provides free accident insurance for its regular and associate members.

The Ladies Aid will hold a **SPRING TEA AND SALE** in the **UNITED CHURCH** Raymond on **SATURDAY, APRIL 13th** from 3 p.m. to 7 p.m.

DEATH OF RARE TRUMPETER SWANS ATTRIBUTED TO LEAD POISONING

A flock of great Trumpeter Swans wintering on a swampy pond near Nanaimo, B.C., has been wiped out by lead poisoning. This disease occurs in water fowl which have eaten lead shot. Ducks, geese and swans occasionally feed in ponds where hunters have scattered quantities of lead shot. The pellets eaten by mistake or in the place of grit.

The trouble was first noticed by Provincial Game Warden Greenfield. At that time only nine of the swans had died. An investigation was made immediately by J.A. Munroe, Chief Federal Migratory Bird Officer, Dr. I.M. Cowan of the University of B.C. and Dr. Clifford Carl of the provincial museum. An attempt was made to remove the lead pellets from those birds which had not died, but with out success. The poison had already taken effect.

The Trumpeter Swan, largest and rarest of North American waterfowl, is fully protected in Canada and the United States. Efforts are being made to restore its numbers beyond the danger of extinction.

The dead birds will be studied and mounted by the University of B.C. and the Provincial Museum.

How to Grow Really Tender Vegetables.

Practically any vegetable taken right out of the garden at the door will be infinitely tastier than those out of cans or storehouse, but as any experienced gardener knows there is a vast difference between those properly grown and the other kind. The real secret of tender vegetables is quick, unchecked growth. To get this means planting at the proper time, not too early with tender things that frost or cold weather may check and then they must be harvested when just right. Old gardeners push growth along quickly with plenty of cultivation, fertilizer, and water when necessary, and if possible. They also spread sowings out over at least several weeks so that young stuff is coming along continuously. Another tri-

The past week has been brisk in the real estate business according to Raymond Agencies. Several properties have changed hands in the last short while. The Steve Molnar house has been purchased by Jesse Peterson of Taber. Cyril Layne's residence went to Kelly Nemeth and the Howard Rasmussen home has been purchased by Cyril Layne. Charlie Huppard has purchased the A. L. McMullin residence.

Douglas Costley is home after being overseas for nearly five years with the Army. He is awaiting the arrival of his wife some time in June.

The local Badminton club held their closing party in the Opera House Thursday evening to wind up the season.

SWEET AND LOW

Soft-voiced NORMA LOCKE, who joined Mart Kenney's band one day early in 1944 and has since sung with his musical group in towns back and forth across Canada, can now be heard singing "Sweet and Low" with the band over the CBC Dominion network, on Sundays at 9 p.m. Art Ballman is there too.

Leo's Night Out

Wednesday night in the Opera House, the local Lions staged another annual Leo's Night Out program. This year the program was under the direction of Lion Mel Hanson, and was attended by a large audience. The program was as follows: Community singing under the direction of Tom Allen; Tap Dance by Harry Fairbanks; Making of a Movie, a pantomime, Joe Strong, George Thomson, Herb Wilde, Wm. Wilde, Bert Powelson, Jack Evans, Scott Salmon Darkie Act—Wes McMullin, Comic Reading—Amy Allen, Hobo Jim, Darwin Oler, Accordion Solo—Mrs. Farrel Nelson, Emergency Operation—Herb Wilde, Karl Wilde, Paul Evans, and Bryant Heninger. The proceeds of the evening will be used on one of the Lion's projects.

Other recent patients in the hospital are Mrs. Bert Nilsson, Mrs. Bennett, and Mrs. S. Smith, who has been discharged.

The Womens Institute met at the home of Mrs. R. Litchfield on Thursday evening to make two quilts for the war brides.

One key use is to plant several different types, an early maturing sort, a medium and a late. In the seed catalogue usually will be listed the number of days to maturity. Thus we can purchase, say, peas that will be ready for the table in fifty days, some in sixty and some in seventy. By using some of all three there will be a succession of good crops instead of a regular feast followed by a famine. Most experienced gardeners continue making sowings of carrots, beets, beans, lettuce and spinach from the time the ground is first ready up to mid July.

Snaps and Scraps

Escape, by Ethel Vance, was a best seller novel in the years 1939 and 1940. 'Reprisal' followed in 1942. By the time 'Reprisal' was published it was known that the name of Ethel Vance was used because of the fact that the author did not wish her right name made known. Just why was not told. Now we learn that the daughter of Grace Zaring Stone, or Ethel Vance, was living in Czechoslovakia at the time of the first book 'Escape', and was subject to Nazi reprisal.

Now Ethel Vance has revealed herself as Grace Zaring Stone, author of 'The Bitter Tea of General Yen' and many other novels; wife of Ellis S. Stone, of the U.S. Navy, with whom she has travelled all over the world. She has lived in Europe, the Far East, Australia, Central America and the West Indies.

Her new book is under the name of Ethel Vance and she calls it 'Winter Meeting'. It is the first American story she has ever published.

DUCKS

A pillow's good for somersaults,
Or a sofa, or a bed,
But when a duck stands upside down
He likes a puddle for his head.

Sugar is a habit to which we are all accustomed. It is convenient to use, rich and mellow. Pure substitutes for sugar are:
Cane sugar—16 calories for each tablespoonful. Honey—70 calories for each tablespoonful. Molasses—65 calories for each tablespoonful. Corn syrup—70 calories for each tablespoonful. Maple sugar—65 calories for each tablespoonful. Why cry over the loss of sugar.

Honey bees are more widely distributed over the world than any other insect or animal.

Every Friday afternoon from 3 to 5 o'clock, pious Jews frequent the Walling Place, whose masonry was part of Solomon's Temple. Papers bearing prayers are placed in the crevices of the sacred wall.

James Street's new novel "The Gauntlet" has been sold to Paramount Pictures.

From Moscow comes word that the Stalin Prize for outstanding work in the sphere of arts and literature for the year 1943 and 44 went to Emelian Pugachov, by Vpcheslav Shishkov. This novel is based on the life of Catherine the Great, and won the author one hundred thousand rubbles. The book will be published in English sometime in 1946.

New Books

By Zane Grey: "Western Union" "Code of the West", "Shadows on the Trail", "Knight of the Range" "The Hash Knife Outfit", "The Drift Fence", "Forlorn River", "Arizona Ames", "The U P Trail" "David the King"—Gladys Schmitt "The Boy I Left Behind Me"—Stephen Leacock.

The youngest daughter of Mr. and Mrs. Wilford VanOrman is a patient in the local hospital with pneumonia.

An ambitious program of building and remodelling is going on at Sugar City Motors, where they are putting in a show room, making an outside door to the office and putting a door in the rear of the garage that will enable them to drive straight onto the lot.

Wanted: New and Better Canadians

Production, plenty, peace, is the order of progress.

Canada has not enough Canadians. If they were all workers, to turn our resources to the service of mankind as quickly and as copiously as world need, and our own safety demand. When great numbers of Canadians prefer idleness or social security to primary production, the case is hopeless.

A hungry and a naked world will not quit fighting. Hunger creates chaos and chaos continues until hunger is relieved.

A vast nation, rich in resources, an potential productive power, cannot longer remain underpopulated nor can it continue indefinitely to deny its food and comforts to a needy and desperate world.

Canada must either occupy its place or give way to those who will. Our date with destiny is not distant. It has been brought nearer by the war and the lack of peace is shifting it still nearer daily.

Canada has no effective long term defence and we cannot create one except as a member of a world organization. We can rely for a short time on the co-operation of friendly neighbors, until we and they are swamped by the destructive forces which we and they have created.

Our only hope of playing our part effectively in a world organization is through a constructive, continuing contribution to the solution of the world's basic problem, hunger.

There are two ways in which we can make our contribution. The first is to adopt a national policy that will set no limit to the production of food and the sharing of it by trade or by gift if necessary, with the world. The second is to open our doors wide to all literate, physically and mentally fit, assimilable people.

There is no alternative, we must either do our utmost in feeding and clothing people, here in Canada or where they are, or we must sooner or later sink with them in a war of extinction.

If we bring as many people here as we can, the feeding and trading is simplified. Now, absurd it is to say that a customer in Scandinavia, Holland, Belgium, France, or else where is more valuable where he is exchanging with us a small part of his production, than if he were a fellow-Canadian producing and exchanging all of his earnings here.

SPORT SHOTS

By C. L. M.

Raymond Union Jacks tied up the Provincial Basketball series two all by defeating the Magrath Lions 47-45 in one of the hottest ball games ever seen on this court.

The Jacks opened the scoring and held the lead throughout most of the game, yet neither team ever led by more than a short jump. In the final minutes of play, with a two point lead, the Jacks took up stalling tactics and put on one of the finest exhibitions ever seen.

With the fifth and final game this week end, both teams are in fine shape and should be a game to be talked about for years to come.

Mr. and Mrs. Bruce Hegglo were guests of the Claude Adamsons at Rosemary this week.

Warren Jones and Frank Taylor are both driving new Plymouth cars purchased at Melchin Motors.

A drip is someone who won't give to the last drop.

EARTHWORMS INCREASE SOIL FERTILITY

There is a saying that even a worm will turn, and we hesitate to provoke to retaliation the giant earthworm of an Australian species, which is said to measure nearly six feet in length and retreats underground with a gurgling sound. Poot Cowper refused to include on his list of friends the man who needlessly sets foot upon a worm. Probably anyone who trod on this big Australian would do so accidentally. The naturalist Darwin was a friend of the smaller English worm and took this trouble to count 53,000 of them in an acre of garden. He estimates that ten tons of earth per acre passes through their bodies and that they bring mould from below at the rate of three inches surface depth in fifteen years.

This superintendent of an experimental station in the Peace River country discovered that the soil there was devoid of earthworms. Mindful of the benefits ascribed to these creatures he asked that a few be sent to him from headquarters Ottawa. His repeated request for worms went unheeded, and finally he wrote: "Don't bother, I've got some." They had arrived in the earth adhering to the roots of young shrubs. Whether the worms multiplied and proved beneficial in the already fertile soil of the Peace is not recorded, but the situation gave rise at the same time to some controversy regarding the value of worms in the soil.

A farmer in New Zealand observed that in a green and expanding patch of pasture the grass was of superior quality. This soil has been found to contain large numbers of small light coloured earthworms. Transplanting of worms in sods on other areas was undertaken, until now 700 acres of the grazing land have been planted with worms. The result has been to nearly double the sheep carrying capacity of the pasture. Wormcasts are known to be richer than the surrounding soil in nitrogen, phosphate, and potash, though this may be due partly to the selective feeding instincts of the worms. However, the evidence in favour of the earthworm seems fairly conclusive.

Independence of the Weekly Newspaper

Simon Strunsky, one of the leading editorial writers of New York "Times" maintains that a single copy of a weekly newspaper slowly absorbed may succeed in driving home a point more effectively than seven daily papers repeating the same point every day for a week. He says: "With us, the small town and county newspaper, which is often a weekly journal, is more influential than the daily press. A weekly newspaper which is read and absorbed in the seclusion and comparative leisure of a small town or farm is likely to exercise a greater pull on its reader than the daily paper crammed with a bewildering array of reading matter and consumed amid the distractions of urban life.

Co-operation In Education

THERE WERE FEW ASPECTS OF LIFE which were not affected by the German conquest of Europe, and the task of restoring the occupied countries is an enormous one. One of the many urgent needs is for the re-building of educational institutions, which were often wilfully destroyed by the Nazi invaders. In 1942 a conference of Allied Ministers of Education was called in London, when plans were discussed for providing assistance in restoring the schools and colleges of Europe after the war. Later, representatives from the Dominions of the British Commonwealth, India, the United States, Russia and China were invited to join the original organization, which had consisted only of members from Britain and nine enemy-occupied countries of Europe.

Book Centre Was Set Up

Early in the present year this work was formally taken over by the Preparatory Commission of the United Nations' Educational, Scientific and Cultural Organization. One important project of this body is to provide books and periodicals for Allied national and university libraries. This work was commenced several years ago, funds being provided by Britain and the Allied governments. An inter-allied Book Centre was opened in London and already nearly half a million books have been collected, through book salvage drives, and as gifts from universities, cultural societies and interested individuals. At present two hundred thousand books come into the Centre each week, and the objective is to have two million books available for distribution at the end of this year. In addition, the problem of providing school equipment and scientific apparatus has been studied, as well as plans for the international exchange of teachers and students.

May Contribute To World Peace

It has been recommended that this work be incorporated in an educational organization within the structure of the United Nations, and forty-four nations have already agreed upon a constitution for a United Nations' Educational, Scientific and Cultural Organization, the aims of which are "to contribute to peace and security by promoting collaboration among nations through education, science and culture, in order to further universal respect for justice, human rights and the fundamental freedoms which are affirmed for the peoples of the world by the Charter of the United Nations." It is possible that through this work a lasting and constructive contribution will be made to the cultural re-building of Europe, as well as to a greater measure of co-operation and understanding among the nations.

British Who's Who Carries Biography Of The Aga Khan

The Aga Khan is a prince above princes. His biography in the British Who's Who lists his honorary degree from Cambridge, his British honors and decorations, his chairmanship of the Indian Round Table Delegation of 1930 and 1931, his presidency of the League of Nations Assembly in 1937, his victories in the Derby, his eleven-gun salute and, almost incidentally, his religious role. He is, in fact, a descendant of Fatima, the daughter of Mohammed, and as such is believed by his followers to have divine attributes. These are not visible to Western eyes. Indeed, he does not parade them for the benefit of his cosmopolitan friends. On the worldly scale he is a character with two phases: an Indian leader who has tried to unite India's Moslems, and has done a good deal for the economic welfare of his Indian followers, many of them converted Hindus; and an international playboy of a type not so common as it used to be.—New York Times.

India's area is 1,576,000 square miles and contains more than 400,000,000 people.

OVER 100 MILLION BOTTLES SOLD! VERY EFFECTIVE FOR MONTHLY PAIN

Lydia E. Pinkham's Vegetable Compound DOES MORE than relieve monthly pain when due to female functional periodic disturbances. It also relieves accompanying weak, tired, nervous, cranky feelings—of such nature. Pinkham's Compound is a uterine sedative—one of the most effective medicines you can buy to relieve such symptoms.

Just Existing

Some Homes Too Orderly For People To Live In

We have had the experience, as has probably everyone, of going into houses in which real living is forbidden. These are the ones where there is a mania for cleanliness and order, amounting to a fetish. We often wonder what satisfaction they bring to the too-particular housewife.

There are houses with parlors that are never open, even those where the front door is unused. Expensive rugs must not be profaned by the tread of shoes carrying the dust of the streets.

There are bookcases filled with volumes that must not be handled for fear of smudges, curtains that must not be subjected to the fumes of tobacco smoke.

The family exists mainly in the kitchen. It does not, of course, live. Under such a regime, real living is impossible.—Windsor Star.

THE WAY IT WORKS

Going to the new restaurant for lunch. Jones ordered brown bread. The waitress brought him white. The second day he ordered brown and again got white. This went on for a week.

Then he decided that the only way to get what he wanted was to order the opposite. So he started the new week by adding to his luncheon order:

"And bring me some white bread." "But," exclaimed the girl, "aren't you the gentleman who always has brown?"

First editor of the London News-Chronicle, which is celebrating its centenary this year, was the novelist Charles Dickens. 2665

Price Control And Rationing Information

Q.—How many sugar-preserves coupons become valid in the month of April?

A.—Three of the new combined sugar-preserves coupons will become valid during April. \$5 on April 1 and coupons \$6 and \$7 become valid on April 18. Pink sugar coupons numbered 46 to 70 expire on March 31.

Q.—Will we be receiving another ration book from the Wartime Prices and Trade Board?

A.—Ration book number six will be issued early next fall.

Q.—I heard over the radio while I was listening to "Soldier's Wife" program that we could obtain suggestions from some department of the government in Ottawa for extending butter. Where could I write to obtain these recipes?

A.—These recipes for stretching the butter allowance may be obtained by writing to the Department of Agriculture, Ottawa.

Q.—A friend of mine told me that she bought butter at a store without coupons, by promising them at a later date. Is this lawful?

A.—The law demands that coupons must be surrendered at the time rationed goods are purchased.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

GEMS OF THOUGHT

BEHAVIOR

Men's behavior should be like their apparel, not too strait, or point device, but free for exercise or motion.—Bacon.

To be always thinking about your manners is not the way to make them good; the very perfection of manners is not to think about yourself.—Whately.

Simplicity of manner is the last attainment. Men are very long afraid of being natural, from the dread of being taken for ordinary.—Jeffrey.

There are men whose manners have the same essential splendor as the simple and awful sculpture on the friezes of the Parthenon.—Ralph Waldo Emerson.

Right motives give opinions to thought, and strength and freedom to speech and action.—Mary Baker Eddy.

Nothing except what flows from the heart can render even external manners truly pleasing.—Blair.

Oyster shells in colonial days were used widely as blast furnace flux.

Conserve Feed Supplies

Saskatchewan To Develop Long Range Fodder Production

Steps will be taken this year by the Saskatchewan government to conserve feed supplies and develop a long-range program for fodder production in all deficiency areas in the province. It has been announced by Agriculture Minister I. C. Nollet.

Mr. Nollet said that the agriculture department wanted local groups to organize in order to create fodder reserves for at least one drought year. He said that "the possible use of vacant lands and irrigable areas for this purpose will be fully investigated."

A committee named by the minister of agriculture conducted surveys of two municipalities in 1945. These surveys dealt with grass land, water supplies, irrigation possibilities and pasture development. The studies will be continued in order to develop policies for land use.

WINNIPEG GIRL IN FILM LEAD

One year ago, blonde Dorothy Patrick was just another Little Theatre player in Winnipeg. Now she has been handed one of Hollywood's choicest acting plums—the role of Jerome Kern's wife in M.G.M.'s film biography of the late composer, "Till the Clouds Roll By." A former Powers model, she will play opposite Robert Walker.

SMILE AWHILE

Jiggs Lent: "I see you are mentioned in one of the books just published."

Betty Mauney: "Indeed! What book?"

Jiggs Lent: "The directory."

Joy Kalt: "Is he really dumb?"

Bonny Ritchie: "Sure, he thinks a football coach has four wheels."

Joy Kalt: "Isn't that silly! How many wheels has it?"

"Are you sure you can cut up your own meat?" asked Auntie.

"Yes, thank you," replied little Bobby politely. "I've cut up a good deal tougher meat at home."

"What makes you look so dirty?" asked the neighbor.

"Well," replied the little lady of five, "you gave my brother a dime yesterday to wash his face."

"Is there diplomacy in lustiness, dad?"

"Certainly, my son. It's the art of never saying no but always taking a matter under advisement."

Vicar: "How did you get that black eye, Mrs. Green?"

"Well, sir, my husband came out of prison last Tuesday, which was his birthday, and I wished 'im many 'appy returns!'"

Young Man: "How about some old fashioned loving?"

Sweet Young Thing: "All right. I'll call grandmother down for you."

"Shirley, are you ready? Your boy friend's car is at the door."

"Yes, mother. I hear it knocking."

Sonny: "Dad, what do you call a man who drives a car?"

Dad (a pedestrian): "It all depends on how close he comes to me, my boy."

"Can you milk that cow?" the farmer asked the new land-girl.

"I'll try," she answered.

"Right. Go ahead and let's see what you can do."

Twenty minutes later the farmer returned. "Well, how did you get on?" he asked.

"Not so bad," replied the girl; "but wouldn't it have been better if I'd had a bucket?"

A waitress asked me what I wanted. "I feel like a sandwich," I said. She said, "Just give me your order. Don't blame me if the place is overcrowded."

The two men hadn't met for 15 years.

"And is your wife as pretty as she used to be?" asked the first.

"Oh, yes," replied the second, "but it takes her much longer."

"Which would you prefer in your future husband — wealth, ability, or appearance?" asked the pretty girl.

"Appearance, my dear," replied the splinter, "but he's got to appear pretty soon."

"If you don't behave yourself," scolded a worried mother, "I'll call a policeman."

"If you do," answered the child, "I'll tell him we haven't got a radio licence."

Here's Speedy Relief For

Tender, Aching, Burning Feet

Your feet may be so swollen and inflamed that you think you can't go another step. Your shoes may feel as if they are cutting right into the flesh. You feel sick all over with the pain and torture; you'd give anything to get relief.

Two or three applications of Moore's Emerald Oil and in a few minutes the pain and soreness disappears.

No matter how discouraged you have been, if you have not tried Emerald Oil then you have something to learn. Get a bottle today—at all druggists.

No Time To Relax

Chaplain Thinks Americans Being Too Lenient With Japanese

"The Japs are laughing at us behind our backs," according to Father Francis J. McCullough, chaplain of the 306th Infantry Regiment now occupying the southern tip of the island of Hokkaido.

As a churchman, he believes in tolerance and charity, but he is convinced that the Americans should be more firm.

"It is characteristic of the Japanese to respect nothing but authority," he said. "Their whole scheme of life is based on that principle."

"Until we have had time properly to convince them of the error of such tenets, we shouldn't be too lenient. We can be firm and yet be kind. Only after the Japs have proved an absolute willingness to go along with us should we reward them by relaxing our attitude."

A GOOD BUY

A Drake county resident considers the dollar he paid for an old clock at an auction in Greenville, Ohio, recently well spent. Inside the clock he found an ancient United States \$50 bill—and a \$5 Confederate note.

Few people in Hawaii speak Hawaiian as English is the language most widely used.

BRIGHTER Homes are HAPPIER Homes

Enjoy the day-like brilliance of a Coleman Lamp in your home. It will make your home brighter, lighter and happier.

The popular Coleman "Regal" is a SAFE lamp. Fuel can't spill, flame can't creep up. It is an ECONOMICAL lamp, uses 10-cent mantles, burns 94% air, 6% fuel. It is a BRIGHT lamp, too, durable and attractive.

INCREASED WHEAT ACREAGE BADLY NEEDED

More and more evidence continues to pour in of the distressing state of the people of Europe and Asia, owing to a lack of food. Many will starve this present year but millions of lives can be saved if more food can be shipped to them. The lack of food will persist during the whole of 1946. Prairie farmers can help by sowing a greater acreage of wheat and by

setting aside less land for summer-fallow this coming year, and still sow the same acreage to oats, barley and flax.

This last year we had 19.1 million acres in summerfallow, whereas in 1923 at the start of this war we had only 14.7 million acres, and in 1931 when our acreage in wheat was considerably higher than it was last year we only carried 12.4 million acres in summerfallow. There does not seem to be any good reason why, in this time of desperate need of wheat in the world, we should carry so much more summerfallow than we have ever done before. By sowing a greater acreage to wheat this spring, so by producing more wheat—man's finest foodstuff—our prairie farmers can help decisively to save millions of lives of European people, just and

WEEKLY LETTER

Planning the Home Grounds

When building a new home, the necessity of a good plan is most important, since if a building is improperly located, it is often no easy matter to right the matter. For convenience, let us consider the planning of a town lot to illustrate the application of certain fundamental principles.

The first consideration after choosing a site is the location of the house. It should be placed a suitable distance from the road, near enough for convenience, but not so near that there is no foreground, nor so far back that there is too great a sense of distance. The size of the house governs this consideration to a considerable extent. For instance a large house may be placed farther from the road than a smaller one and yet give the same effect. The method of planting the front yard can aid greatly in this respect. That is, a small house can be placed a considerable distance from the road and yet not seem too far by using a small hedge or none at all along with beds of low growing plants to break up the extensive effect of a large lawn. In like manner a tall hedge or an open lawn will enable a large house to be placed nearer the road without giving it undue prominence.

It is desirable that the house be so placed as to give a sense of proportion to the property; that is, the lot should not seem over balanced on one side due to all objects not being clustered there. If the house is near one end of the lot, it can be counter-

balanced by a garage, a clump of trees or shrubs, or some other object towards the opposite end. In like manner, if close to one side, the other side could be so arranged as to balance it in mass effect. It is well to remember that balance is not achieved by mass effect only. For instance, a large house does not have to be counterbalanced by an equally large garage, or a number of buildings and trees equal to it in mass. Just as a long handled lever will lift a heavy load, so will a small mass of buildings, far from the centre of the lot, balance a large house which is nearer the centre of it.

It is possible, however, to have so large that they cannot be fitted to the lot without giving a crowded effect. The cure for this condition is more property. Small buildings can give an equally unsatisfactory result unless steps are taken to give the house its due importance. Always remember that the house should be the centre of interest, all other things being subordinate. A small house therefore is often made insignificant by a higher hedge or tall trees. The object should be to grow smaller plants and place them about the house in such a manner as to accentuate the size of the house. Often shrubs planted at the corners will give the effect of greater mass.

These points concerning layout of grounds are important first considerations. Dr. "You should take a bath before you retire" Patient "But doctor, I don't expect to retire for another twenty years"

Jobs Follow Organization

But Employers and Workers Must Assist

During the war organization of manpower was made possible through co-operation of employers and workers.

This co-operation is no less necessary to assist in organizing the employment market during the present critical period.

Some manpower controls still remain. These are still law. They are aimed at assisting in organizing the employment market.

Remaining controls are designed to help employers and workers—and actually require only minor assistance from the public.

YOU ARE URGED TO COMPLY WITH THE FOUR CONTROLS WHICH REMAIN:

- 1—Employers MUST notify the National Employment Office of any need for workers, as soon as that need is known.
- 2—Where employers engage workers outside the National Employment Service they MUST notify the nearest NES Office within three days, that an employee has been engaged. (Form NSS 312 is provided for this purpose.)
- 3—Unemployed workers seeking employment MUST register with the National Employment Office if unemployed for seven consecutive days.
- 4—Generally speaking, any employer or employee MUST give seven days' notice to the other party of any intention to terminate employment. (Form NSS 120 is still required.) Exceptions may be learned from the nearest NES Office.

The partners to industry—employers and employees—should help the National Employment Service to promote a high level of employment by complying with these simple rules.

Only with public support can an employment service give full assistance to the community.

Make full use of the Local Office of the National Employment Service. It is there to serve your needs, and those of the entire Community.

The real proof of courtesy and restraint is to have an ailment such as the other fellow has and not mention it.

Too many cooks may spoil the broth but democracy demands that everyone starts cooking.

Care more for others and our own cares grow less.

SEEDTIME and HARVEST
By Dr. F. J. GREANEY, Director, Line Elevators Farm Service, Winnipeg, Manitoba.

Farm Service Objectives

Line Elevators Farm Service began its active work in 1940. It was organized for one purpose only. That is, to plan and carry out a programme of work which would benefit the prairie farmer.

Six years is a very brief period in the life of an agricultural organization. Yet, during this time, Line Elevators Farm Service has become a firmly established agricultural institution. It is a credit to its sponsors, and to its first Director, Dr. K. W. Neatby.

Under its new Director, this department will continue to have three main functions. Very briefly these are: (1) to serve as an information bureau, on practical and technical problems, for farmers, grain buyers and others; (2) to provide specific services such as germination and disease tests of farmers' seed-grain samples, the identification of weeds, etc.; and (3) to assist and encourage agricultural organizations such as junior farm clubs, and to help newly-established war veterans. In addition, further effort will be directed towards the problems of weed control, soil conservation, and disease and insect control.

At this time, Line Elevators Farm Service dedicates itself anew to the task of giving service to prairie farmers, and to this end offers its services to other agricultural organizations.

In taking "Seedtime and Harvest" over from Dr. K. W. Neatby, I can assure its readers that the present policy of presenting general articles of current interest will be continued. I shall do my best to maintain the high standard established by my predecessor.

THE NEW Charm-Kurl SUPREME COLD WAVE

with Kurlium
Gives Natural-Looking
CURLS and WAVES
IN 2 to 3 HOURS
AT HOME

It's headless—machineless—takes only 2 to 3 hours, yet your lovely, easy to manage Cold Wave Permanent will last months and months. Guaranteed to satisfy as well as any \$15.00 professional COLD WAVE or more back on request. Ideal, too, for children's soft, fine hair.

Costs only 1³⁵

Contains 3 full oz. of Kurlium, 60 cutters, 60 end tissues, cotton applicator, neutralizer and complete instructions. Get a Charm-Kurl Supreme kit today.

Getting Off on the Right Foot

AN OPEN LETTER TO CANADA'S EX-FIGHTING MEN

You and your fellow servicemen have fought for the peace, freedom and happiness we now enjoy.

We, in common with all true Canadians, believe that you should receive your fair share—a goodly share—of the prosperity that could not be ours without the victory you have achieved. We believe that, unless our ex-fighting men as a whole reach a good standard of living, Canada cannot attain that full measure of the prosperity for which we all hope.

We, at the Bank of Montreal, are anxious to do all in our power to help every veteran find his particular niche in the new peace-time Canada, either in a

job to his liking or in a business of his own that will afford him a full and prosperous life.

Reproduced in this advertisement are some thoughts from a booklet we have prepared to help veterans find their feet in civilian life. It is our hope that when you are struggling with the problem of starting afresh on "civilian street" the booklet may be very helpful to you.

Further, we extend a friendly invitation to you to drop in and chat things over with any one of our managers.

His knowledge of the present situation, local conditions, trends in business circles and the economic life of the community may be useful in the search for your niche. Perhaps he can offer helpful suggestions, sound advice, or a timely bank loan if you are thinking of branching out for yourself.

The booklet, "Getting Off on the Right Foot", is yours for the asking. Write, or see, your nearest B of M manager today.

WORLD HAPPENINGS
BRIEFLY TOLD

One of the strangest air cargoes ever landed at Dorval airport arrived in a special plane bringing \$65,000 worth of live chinchillas to Montreal.

The last of Canada's 103 surplus corvettes—sleazy, tubby little craft that plagued the Nazi U-boat packs—have been sold by the War Assets Corporation.

The Soviet Union intends to increase its cultivation area this year by 20,000,000 acres as part of the new five-year plan, Moscow radio said.

Over 1,000 "splendid types" of Japanese women, all over five feet tall, responded to a Metropolitan police call for 50 policewomen, the newspaper Mainichi Shimbun said.

A bust of Gladstone is to be removed from the town hall at Kildenny, Eire, because councillors believe no shadow of a former British prime minister should fall on the assembly rooms.

A police school for recruits for the Gibraltar Police Force, has been opened. The recruits are trained on the syllabus of instruction for candidates for the Metropolitan Police in the United Kingdom.

Dr. Alexander Fleming, discoverer of Penicillin, has been awarded the Harben Gold Medal for 1946 by the British Royal Institute of Public Health and Hygiene for "eminent services rendered to public health."

A ceremonial scarf for King George, together with a letter containing Tibet's congratulations on the Allied victory, was received by Viscount Weyall, Viceroy of India, from the leader of a Tibetan goodwill mission.

Applies Anywhere

Many People Eat Too Much Even When Food Is Plentiful

The Buffalo Courier-Express says: While the request by President Truman's Economic Emergency Committee for a reduction of 40 per cent in wheat consumption and 20 per cent in fats may sound rather drastic, the fact remains that this is the best fed nation in the entire world and that millions of Americans eat daily much more food than they require. To such an extent is this true that medical men are forever warning against excessive eating. Thus millions of Americans, who have previously been eating more food than they need, will be expected to reduce in the campaign against starvation in Europe and Asia, enjoy much better health. The reduction in the weekly food bill is not a factor lightly to be disregarded either. Less avoidable waste means more money in the bank.

Experimental Farm

Alberta Farmer Going To Establish One In Ethiopia

While Emperor Haile Selassie, of Ethiopia was in forced exile in England during the war he learned to enjoy the fruits and vegetables grown on Canadian farms. As a result, Howard Thompson, Markerville, Alberta, farmer has been commissioned to set up an experimental farm for the Ethiopian government in that country.

Mr. Thompson's brother, a missionary in Ethiopia and friendly with the emperor, persuaded him to take the job. At present he is busy purchasing nursery stock in the Bowden area. Stock already purchased includes garden seeds, trees, bushes, shrubs, strawberries and other plants.

The seeds for Ethiopia will be sent in sealed containers to ensure dryness and, along with the nursery stock, will go by ship to Cairo and from there will be flown to its destination.

Mr. Thompson has just returned from a short trip to Ethiopia, and plans to take his wife and family back with him. His contract is for three years and his family will have to take clothing for that time. Finding the country much like Alberta, Mr. Thompson plans to settle there permanently.

The Ethiopian government have given Mr. Thompson a half section of land in Ethiopia and \$5,000 to buy the necessary nursery stock, a tractor and other farm implements.

Wants To Make Tests

Man Has Idea His Invention Would Defy Atomic Bomb

Jean Lassier, who went over the Horseshoe Falls in a rubber ball on July 4, 1928, announced that he would like the United States navy's permission to test a new type rubber ball against the atomic bomb.

Lassier has started plans to interest naval authorities in his newest proposal. It is to house rabbits with food enough for a week in the smallest of three specially designed concentric rubber balls. He said the atomic test device would consist of balls 12 feet and 5 feet respectively in diameter. He plans to line each space except the inner rabbit quarters with protective lead, asbestos and cork.

BUILT IN ONE DAY

Prefabricated houses, consisting of four rooms with wooden floors and tiled roofs, now are being produced by a building firm in Nairobi, Kenya, to help solve the African housing problem. They cost about \$160 each and can be erected in one day.

The sun loses 4,000,000 tons of mass per second, a speck of dust in relation to its total mass of two billion billion billion tons.

EX-KING OF YUGOSLAVIA AND SON WHO LOST THE CROWN—Even though he hasn't a throne any more, Mr. Peter Karageorgevitch, ex-king of Yugoslavia, is hoping his son will some day wear the crown he lost. The young prince, Alexander, gets a smile from his parents. Yugoslavia, under Tito, was declared a republic.

Operation Elephant

Mobile Anti-Aircraft Battery Was Intended To Guard Churchill

Macdonald Hastings tells this story in the Picture-Post:

From the time he became Prime Minister it was manifest that Mr. Churchill's own safety was a major factor in Britain's defence. So looking after him was regarded as a military operation, and it was called "Operation Elephant"—the elephant being the Prime Minister.

One of the features of "Operation Elephant" was a mobile anti-aircraft battery which used to accompany the Prime Minister wherever he went. Churchill took immense pride in this anti-aircraft battery. He used to call it, to the indignation of the officers, his personal flak, and when he went away for the week-end to the country he always insisted on having one of the guns mounted outside the front door so that he could display it proudly to his guests.

As a personal defence the anti-aircraft battery was a failure. The original arrangement was that if hostile aircraft came within 30 miles of the Prime Minister the guns would be manned and Mr. Churchill and his staff were to go to the air raid shelter. But it did not work out that way. As soon as the air raid alarm sounded, far from going to the shelter, the Prime Minister grabbed his field glasses, raced up the stairs and took his stand in the most exposed position on the roof.

Up there he insisted on a complete plot of the raid and was always extremely disappointed if his personal flak did not start firing. So finally, unknown to the Prime Minister, it was decided that it was far safer not to sound the air raid alarms at all.

The Japanese invented the folding fan in the seventh century.

Loss Felt Keenly

London Times Pays Fine Tribute To Hon. Vincent Massey

The Times of London, in a lengthy eulogy, referred to the retirement of Rt. Hon. Vincent Massey as High Commissioner in London, as the loss to British public life of an eminent and popular figure and called him "The father of the Canadian Diplomatic Service."

"During more than half of his term of office, Great Britain and Canada jointly were engaged in a supreme struggle for the defence of their common ideals, and it fell to Mr. Massey, to become head of the Canadian community in and out of uniform that quickly formed on British soil."

The Times said Mr. and Mrs. Massey both had labored constantly and successfully to promote the welfare of Canadian men and women on war service in the British Isles and had entered fully into the life of Britain in peace and in war.

The newspaper described Mr. Massey's war speeches as an inspiration in dark times, which would be remembered as a Canadian interpretation of the faith by which Englishmen and Canadians are united.

OUTLOOK OBSCURE

Although it is hoped Canada's domestic butter ration will be increased from four to six ounces by May 1, the possibility of improvement in the over-all situation remains "fairly obscure," O. W. Rodon, administrator of ration administration, Montreal, said in an interview at Vancouver. Whether there will be an improvement depends upon the nation's ability to produce next year, said Mr. Rodon.

Engineers recently proved scientifically that glass is some 300 times smoother than satin and about 475 times smoother than silk.

Better Than Meal

Small Boy Sacrificed Lunch Money But Got Big Thrill

The late Sidney Gedge, for many years solicitor to the London School Board, when over 90 said that as a little boy of nine he came up to London to spend a holiday with relations.

In the casual manner of the times the child was sent out to amuse himself as best he might, with a shilling in his pocket for his meals. Strolling into Trafalgar Square he found the newly erected Nelson column still festooned with scaffolding, and watching his opportunity to evade the workmen scrambled up the ladders. But he reckoned without the monumental masons, for when he emerged on the top of the column they were there, and there lay Lord Nelson, not yet erect upon his feet.

The men were angry, and said that he must "pay his footing." So he was forced to hand over his shilling. "But," Mr. Gedge added, "I said to myself I was going to have something for my money, so I stooped down and kissed the face of Nelson." I think he felt the elation was worth the subsequent hungry afternoon.

LONGEST NON-STOP RUN

The world's longest regular non-stop railway run is that between London and Edinburgh, 393 miles, and the second from London to Carlisle, 293 miles, according to British Railways.

To Feel Right — Eat Right!

Not A Bad Idea

Might Be Wise To Have Occasional Fire Drill In Home

There have been so many fires in homes during the past few months in which lives of adults as well as children have been lost that the question suggests itself: "Why not have fire drill in the house?"

Every passenger in an Atlantic liner has to undergo simple life-saving drill and instruction on deck the second day out so that they may know what to do and where to go—just in case. The danger of fire in a home is greater than the danger of being in a shipwreck, yet few, if any people, think of figuring out what they would do if the house caught fire. An occasional drill in the home might save many lives, because so many people who have been overcome by smoke and suffocated or burned to death, do so because they became panicky and did the wrong things.

The usual thing is to make a dash for the main stairway, whether in home or hotel, and invariably people who escape fires report that they found their way barred, because flames were creeping up the stairs. This is due to the scientific fact that the open stairway attracts the superheated air and gases from the seat of fire and the stairway itself is one of the first things to burn.

The cautious household will study the situation, make for the back door or a side door if the way is not barred by fire, and in the last resort make for a window where there is a veranda, kitchen or woodshed where they can stand and await rescue if it is too high for a leap to the ground.

Is Losing Out

Doctor Predicts Penicillin Will Become Useless For Some Diseases

Penicillin is losing its punch so rapidly that it was predicted this wonder drug may become almost completely useless in a few years for some diseases.

The trouble is not in penicillin but in special strains of germs, present in many diseases, which are able to resist penicillin, and which are spreading rapidly while their fellows are being destroyed by the drug.

The prediction was made by Dr. Hans Molitor, of the Merck Institute for therapeutic research, in a report to the federation of American societies for experimental biology.

PLASTIC LINED SHIP

A big future is expected for a new structural material produced by the British plastics industry. This material, known as heloplast, was used in the first plastic-lined ship, the Empire Antigua, launched from the Tyne-side recently. Heloplast makes a perfect boarding for a ship's interior, i.e., for doors, walls and nonslip flooring. It is unaffected by water, normal heat changes, most solvents, oils and organic and dilute mineral acids and it is impervious to vermin and white ants.

The housefly vibrates its wings 20,000 times a minute.

WEEKLY RATION FASHION

for a twosome

SUN.	MON.	TUES.	WED.	THU.	FRI.	SAT.
Upside Down Meat Loaf	Sausages	Oyster Stew	Meat Patties	Steak & Kidney Pie	Egg Scallop	Lamb Chops
Group C	Group D	unrationed	Group B	left over (kidney unrationed)	unrationed	Group C
1 lb. 4 tokens	1 lb. 3 tokens		1 lb. 5 tokens			1 1/2 lb. 2 tokens
2 tokens remaining.						

An upside down meat loaf is an eye-appealing and plate-pleasing means of affording a party touch for week-end hospitality without infringing too greatly on your week's ration. To achieve such a goal, line the bottom of a greased baking dish with slices of cooked sweet potato, lightly sprinkled with brown sugar. Top with your very best mixture of ground meat (veal with pork or beef makes a good combination) artfully seasoned and strategically extended with crumbs and egg. When baked, turn upside down on serving platter and garnish with some vegetable greenery. As fat saved from meat cooking assumes a real significance these days, sausages are suggested for Monday to help you balance supply and usage. From the pound purchase you will be assured of a tasty dinner as well as some extras to add a spark to a breakfast menu. While there's still an "R" in the month, an oyster stew will fit well into the meatless day pattern of Tuesday. For complete satisfaction accompany it with crisp crackers, strips of raw carrots, turnip and celery, and follow it with that favorite dessert you've been hesitating to have because it seemed a bit too much after the usual dinner. Middle of the week purchase is one pound of round steak. Half of this can be minced for Wednesday's meat patties. And these can be given that "something different" in flavor and texture by combining grated carrot with the seasoned meat. For Thursday, the rest of the round steak is scheduled to appear, along with unrationed kidney, in a succulent steak and kidney pie. You can ease the fat situation by exchanging its traditional pastry lid for a light biscuit one. An egg scallop is satisfying fare for Friday and is a quick trick if you combine mushroom soup with cooked macaroni and alternate it with sliced hard, cooked eggs in a casserole. Cover with crumbs, oven heat until bubbling and browned, and partner it with some colorful vegetables. Lamb chops make a grand finale to the week's eating and go well with baked orange halves, scalloped potatoes and baked beets. The two remaining tokens will be useful to augment Saturday's purchase if you are in a convivial mood, or to lay away for a roast day.

LIFE'S LIKE THAT

By Fred Neher

"Maybe it isn't any laughing matter dear... but you do look funny with that little bag on your head and those big ones under your eyes."

REG-LAR FELLERS—Asking the Impossible

THIS CURIOUS WORLD

By William Ferguson

IN 1900, 6 PER CENT OF THE UNITED STATES POPULATION OF SEVENTY-FIVE MILLION WAS OVER 60 YEARS OF AGE. BY 1980, STATISTICAL FIGURES ESTIMATE A POPULATION OF ONE HUNDRED FIFTY MILLION, WITH 23 PER CENT SIXTY YEARS OR OLDER.

WHERE'S ELMER?

MOST BIRDS FLY AT AN ALTITUDE OF AROUND 3,000 FEET WHEN MIGRATING.

ANSWER: Where Colorado, New Mexico, Arizona and Utah meet

BY GENE BYRNES

Initial Wheat Payment Will Be Continued

OTTAWA.—Trade Minister MacKinnon announced in the commons the government will continue the present initial wheat payment of \$1.25 a bushel basis No. 1 Northern in store Fort William-Port Arthur or Vancouver for another crop year up to July 31, 1947.

He said there would be no overall reduction on the deliveries of wheat during 1946-47, although "temporary delivery quotas will probably be used in the early part of the marketing season to distribute local elevator space as evenly as possible among the producers."

Delivery permit books again will be used.

Payments on the participation certificates for the 1943-44 wheat crop will be started by the Canadian wheat board in June, with the 1944-45 barley equalization payments being made in May, he also announced.

Both payments will apply to the prairie provinces.

Payments on the 1944-45 Ontario wheat equalization fund will begin in May.

Mr. MacKinnon added: "While the accounting and auditing on these payments are well advanced, it is not possible at this date to announce the amount of each payment to be made. That announcement will be made just as soon as possible."

Mr. MacKinnon said he was fully aware of the anxiety, particularly in western Canada, for the earliest possible payment of the participation certificates.

The government had been asked if it could make payments in some areas in advance of others. The wheat board said this was not possible but when general payment was made it might be possible to make payments to certain areas first.

Mr. MacKinnon said discussions are continuing with regard to other lines in the 1946-47 grain program and further announcements will be made as decisions are reached.

These announcements will include the prices to be paid for oats, barley, flaxseed, rapeseed and sunflower seed in the western provinces and for winter wheat grown in Ontario and marketed in 1946-47.

NOT EXTENDING DATE

U.S. Government Will Withdraw From UNRRA On December 31

ATLANTIC CITY, N.J.—The United States government has warned the world that it would have to feed itself after Jan. 1 when it definitely will cease all participation in organized relief.

Assistant Secretary of State William Clayton told the 47-nation council of the United Nations Relief and Rehabilitation that the U.S. will withdraw from UNRRA on that date.

The U.S. Clayton said, already has paid or earmarked \$2,700,000,000 for relief of invaded countries and will not finance further relief after Jan. 1. This government will not support any extension of UNRRA beyond the dates already set for its expiration, he added. Dates for UNRRA expiration are Dec. 31 in Europe and March 31 in the Far East.

Three-fourths of all money contributed or pledged to UNRRA have been paid by the United States, Clayton said. This has amounted to \$2,607,000,000.

Although the U.S. will withdraw from UNRRA, Clayton indicated that it was willing to contribute towards further relief through combined food boards and would allocate a fair share of grain, fats and other foodstuffs provided they were bought in an open market with funds each needy nation can borrow from the new international bank.

NOT SABOTAGE

Investigation Needed For Only Two Fires On British Ships

LONDON.—Alfred Barnes, minister of war transport, told the House of Commons that thus far he had no evidence that the recent outbreak of fires aboard British ships was caused by sabotage.

Except for the blazes which gutted the Empire Waverley at Liverpool and burned out the hospital of the liner Queen Elizabeth, Mr. Barnes said investigations were unnecessary "because we are satisfied that there was no sabotage behind them."

RESERVE BATTALION

WINNIPEG.—Winning will have the only reserve paratroop battalion in Canada when Canadian army reorganization plans are completed. The Winnipeg Light Infantry regiment has been designated as a paratroop force, and is the first reserve unit in Canada's military history to be named for such a role.

QUOTA FILLED

OTTAWA.—A Canadian wheat board spokesman said flour shipments to the Philippines through the port of Vancouver had been suspended because the combined food board quota to the islands had been filled.

CHURCHILL WOULD KEEP ATOM SECRET—Honorary degree from Filton, Mo., college was occasion for Winston Churchill to call for a watch on Soviet expansion. Alliance of Britain and U.S. was advocated by Mr. Churchill to end wars. Missouri Governor Phil Donnelly, left, listens attentively while Winston Churchill talks earnestly to him after the speech.

Rationing On Scarce Foods Is Necessary

ATLANTIC CITY, N.J.—Reimposition of rationing of scarce foods in the United States and in other producing countries where it now is employed was recommended by Herbert H. Lehman, director general of the United States Relief and Rehabilitation Administration in a report launching a debate on food at the fourth council session of the agency.

His report was delivered shortly after Ambassador L. B. Pearson, head of the Canadian delegation, told a press conference that Canada retained rationing more strict than the wartime levels in order to meet and exceed all its commitments to help feed other less fortunate areas.

Mr. Pearson declared that if by greater effort more lives could be saved he was sure Canada would make that effort.

On the question of Russia's inclusion on the combined food board, he said he was not in a position to state the government's policy but personally he felt "there is no reason in the world why Russia should not join."

However, he said, "It would be interesting to know whether or not Russia wants to become a member of the combined food board."

Mr. Lehman's report on food contained some criticism of the combined food board's allocation practices and painted a dim picture of future possibilities of completely avoiding famine in some shortage areas.

The end of March would show that UNRRA had shipped only 53 per cent. of its first quarter bread grain requirements, 20 per cent. of its rice requirements and less than four per cent. of its edible fat requirements.

"It is my duty solemnly to inform you that on the 17th day of March the administration had not, with the exception of 50,000 tons of flour from the United States and 10,000 tons from Canada, received any assurance of the amount of bread cereals that will be available for it to ship in April," Mr. Lehman said.

"The food outlook is much too tragic for any of us to be less than frank."

"I therefore feel compelled publicly to declare that neither I nor my associates in UNRRA have much confidence that we can depend on voluntary measures alone to move to hunger zones in time the supplies of grain which are known to be available. The proposed voluntary measures will undoubtedly do some good but are in no way sufficient to save the situation."

NOW ESTABLISHED

World Fund And Bank Will Soon Be Ready For Business

SAVANNAH, Ga.—In an atmosphere of apparent harmony and international verbal back-slapping, Treasury Secretary Fred M. Vinson closed the inaugural meeting of governors of the world fund and bank with a declaration that they are "now established and beginning to breathe as living organisms."

Thus the \$9,100,000,000 bank and \$8,800,000,000 fund were formally declared to be in existence. Actual lending and stabilizing activities, however, are still months away.

ON MARKET SOON

WINNIPEG.—Redman, a rust-resistant wheat of high milling quality which recently was recommended for licensing soon should be on the market, Agriculture Minister D. L. Campbell says. He told the Manitoba legislature Redman was "the wheat to watch. It has all the good qualities."

Buy War Savings Stamps regularly.

TAKING NEW POST

Noted Tank Officer Named To Succeed Field Marshal Montgomery

LONDON.—Lt.-Gen. Sir Richard (Dick) McCreery, commander-in-chief of British occupation forces in Austria and a noted tank officer during the Second Great War, was named to succeed Field Marshal Viscount Montgomery as commander-in-chief of the British army of the Rhine.

Lord Montgomery recently was named chief of the Imperial General staff in succession to Field Marshal Lord Alanbrooke, who has held the position since 1940. He will assume this post in June. Gen. McCreery, who took over command of the British 8th Army in Italy late in 1944, and for a few months had the 1st Canadian Corps under him, will succeed Viscount Montgomery this summer.

NO CHANGE SEEN

Increase In Gasoline Price For Prairie Provinces Will Remain

OTTAWA.—Finance Minister Isley said in the commons he did not feel further consideration could be given to representations against recent gasoline price increases in the prairie provinces.

The matter was introduced by F. S. Zaplinsky (C.C.F., Dauphin) who asked reconsideration.

Mr. Isley said subsidies were still being paid to some extent on gasoline in the prairies and such subsidies were not paid in any other part of Canada. The matter had already received lengthy and detailed consideration.

Saskatchewan motorists have commenced paying an extra two cents per gallon on gasoline. The gasoline price increase also affects Manitoba and Alberta but not eastern Canada.

COURSE FOR VETERANS

VANCOUVER.—Sixteen veterans opened Canada's first school of photography. The number of veterans taking the 11 months course will be increased to 48 during the next two months as facilities are expanded. The course is open to veterans from British Columbia, Alberta, Saskatchewan and Manitoba.

FLIGHT A SUCCESS

Plane Returns Safely From Mercy Trip To Repulse Bay

OTTAWA.—An R.C.A.F. Dakota aircraft returned to Rockcliffe airport after dropping supplies and medicines for missionaries at the isolated outpost of Repulse bay in far northern Canada.

Squad. Ldr. D. (Del) Kenny of Fredericton said the plane he piloted reached Repulse bay five hours after refuelling at Churchill, Man., and that one ton of food and additional medicines were dropped from an altitude of about 500 feet.

OTTAWA.—The labor department, reporting national employment offices listed 263,000 unemployed applicants last Feb. 28, said there were signs that Canada's reconversion unemployment peak had been almost reached.

NO REASON FOR ALARM IF "BIG THREE" ARE FRANK—EDEN.

Alarmist view of relations between Russia and western democracies is unnecessary, if true reasons behind current difficulties are faced, says Anthony Eden, shown with dog.

SMOKE POURS FROM QUEEN ELIZABETH AFTER MYSTERIOUS FIRE—Officials of the Cunard White Star Line, owner of the giant craft Queen Elizabeth, hinted that the fire which broke out aboard the liner was the result of sabotage. Scotland Yard investigated. Photo shows smoke pouring from the liner after the fire.

ZABOTIN'S ASSISTANT HAD

CHARGE OF AGENTS -Major Sokolov, commercial councillor for Russia in Canada, who was in charge of the Russian under-cover agents working in Canada, according to an Ottawa announcement. He was assistant to Col. Zabotin.

Brushing aside pessimism as to future employment possibilities in Canada, he said that he feared industrial expansion was coming too rapidly for the amount of materials and manpower available.

"It seems to be that the expansion is coming too rapidly and that we shall face an insoluble problem of shortages of material as well as shortages of manpower when the program now under way comes into full production," said Mr. Howe.

"In total, close to 1,000,000 people have given up their wartime occupations since V-J day," he said. "Over the same period the number of unemployed applicants registered in employment offices has risen from a low of 75,000 to a maximum of 263,000 at the end of February, a net increase of 188,000."

"It is therefore apparent that close to 800,000 persons have voluntarily withdrawn themselves from the labor market."

There were indications a considerable volume of employment still was to come from reconversion and expansion which had not yet been completed. In addition new establishments were coming into operation.

"With the unprecedented demand for consumption and investment goods in Canada, together with the urgent food and material requirements of foreign countries, the number still to be discharged from the forces should be readily absorbed, while a steady absorption of unemployed can be anticipated once the spring and summer demand comes regularly into play," he said.

The 220,000 men still to be discharged from the forces should be steadily absorbed and a steady reduction of unemployment could be anticipated in coming months. He had noted that some western employers had been unable to get the class of men wanted. The shift of men and resources for reconversion were "as difficult as mobilization" for war.

At the Guildhall, Lord Alexander was received by councilmen in blue robes and aldermen in glowing red, with the Lord Mayor, Sir Charles Davis, in the robes of his office, wearing a huge black hat and carrying a great jewelled chain.

Representatives of the nobility, Prime Minister Attlee, high officials of state and members of the cabinet were present to watch the traditional ceremony of presenting a special sword of honor and the freedom of the city.

The hundreds of spectators in the Guildhall cheered the dignitaries.

The new governor-general said: "The atom bomb is a weapon of destruction and, as such, must be handled by experts, which are your armies, navies and air forces." The atom bomb will undoubtedly revolutionize warfare as much as, if not more so than the discovery of gunpowder. It will not alter the main principles of strategy, but it will change tactics. Armies, navies and air forces will not be replaced by it, but their functions and organizations will be changed because of it."

CELLS RENTED

TIMMINS, Ont.—The hotel room shortage in the Porcupine area is so acute that the Timmins police department is forced to take in "roomers". Lodgers usually average two a night but one week the cells housed 25 persons who were unable to find a place to stay.

WORK FOR POLES

KIRKWALL, Scotland.—About 1,500 Polish soldiers are to be employed in removing war hazards from the Orkney Islands. They will clear mines, pillboxes and other anti-invasion obstacles.

Howe Foresees Labor Shortage Before Long

OTTAWA.—Reconstruction Minister Howe said he had never been more optimistic about the employment and reconversion picture in Canada than he was today. Recently back from his first visit to the Pacific coast in some years, he told the commons: "I have never seen western Canada in a state of prosperity in which it is today."

Brushing aside pessimism as to future employment possibilities in Canada, he said that he feared industrial expansion was coming too rapidly for the amount of materials and manpower available.

"It seems to be that the expansion is coming too rapidly and that we shall face an insoluble problem of shortages of material as well as shortages of manpower when the program now under way comes into full production," said Mr. Howe.

"In total, close to 1,000,000 people have given up their wartime occupations since V-J day," he said. "Over the same period the number of unemployed applicants registered in employment offices has risen from a low of 75,000 to a maximum of 263,000 at the end of February, a net increase of 188,000."

"It is therefore apparent that close to 800,000 persons have voluntarily withdrawn themselves from the labor market."

There were indications a considerable volume of employment still was to come from reconversion and expansion which had not yet been completed. In addition new establishments were coming into operation.

"With the unprecedented demand for consumption and investment goods in Canada, together with the urgent food and material requirements of foreign countries, the number still to be discharged from the forces should be readily absorbed, while a steady absorption of unemployed can be anticipated once the spring and summer demand comes regularly into play," he said.

The 220,000 men still to be discharged from the forces should be steadily absorbed and a steady reduction of unemployment could be anticipated in coming months. He had noted that some western employers had been unable to get the class of men wanted. The shift of men and resources for reconversion were "as difficult as mobilization" for war.

At the Guildhall, Lord Alexander was received by councilmen in blue robes and aldermen in glowing red, with the Lord Mayor, Sir Charles Davis, in the robes of his office, wearing a huge black hat and carrying a great jewelled chain.

Representatives of the nobility, Prime Minister Attlee, high officials of state and members of the cabinet were present to watch the traditional ceremony of presenting a special sword of honor and the freedom of the city.

The hundreds of spectators in the Guildhall cheered the dignitaries.

The new governor-general said: "The atom bomb is a weapon of destruction and, as such, must be handled by experts, which are your armies, navies and air forces." The atom bomb will undoubtedly revolutionize warfare as much as, if not more so than the discovery of gunpowder. It will not alter the main principles of strategy, but it will change tactics. Armies, navies and air forces will not be replaced by it, but their functions and organizations will be changed because of it."

CELLS RENTED

TIMMINS, Ont.—The hotel room shortage in the Porcupine area is so acute that the Timmins police department is forced to take in "roomers". Lodgers usually average two a night but one week the cells housed 25 persons who were unable to find a place to stay.

WORK FOR POLES

KIRKWALL, Scotland.—About 1,500 Polish soldiers are to be employed in removing war hazards from the Orkney Islands. They will clear mines, pillboxes and other anti-invasion obstacles.

Although the U.S. will withdraw from UNRRA, Clayton indicated that it was willing to contribute towards further relief through combined food boards and would allocate a fair share of grain, fats and other foodstuffs provided they were bought in an open market with funds each needy nation can borrow from the new international bank.

Except for the blazes which gutted the Empire Waverley at Liverpool and burned out the hospital of the liner Queen Elizabeth, Mr. Barnes said investigations were unnecessary "because we are satisfied that there was no sabotage behind them."

Winning will have the only reserve paratroop battalion in Canada when Canadian army reorganization plans are completed. The Winnipeg Light Infantry regiment has been designated as a paratroop force, and is the first reserve unit in Canada's military history to be named for such a role.

Thus the \$9,100,000,000 bank and \$8,800,000,000 fund were formally declared to be in existence. Actual lending and stabilizing activities, however, are still months away.

RESERVE BATTALION

Winning will have the only reserve paratroop battalion in Canada when Canadian army reorganization plans are completed. The Winnipeg Light Infantry regiment has been designated as a paratroop force, and is the first reserve unit in Canada's military history to be named for such a role.

QUOTA FILLED

A Canadian wheat board spokesman said flour shipments to the Philippines through the port of Vancouver had been suspended because the combined food board quota to the islands had been filled.

Buy War Savings Stamps regularly.

WILL GATHER DATA

Pilotless Drone Planes To Be Used In Bomb Tests

NORFOLK, Va.—The aircraft carrier Shangri-la is steaming toward the Pacific with a cargo of expendables destined to keep a rendezvous with the atomic bomb.

The expendables are pilotless drone planes of the Shangri-la's "Ghost Helix" squadron of radio-controlled aircraft. They will brave the fury of the atomic cloud over Bikini atoll on May 15 to gather, with automatic recordings and sampling devices, data which science hopes will fill gaps in its knowledge of what happens when an atomic bomb goes off.

The drones will fly directly into the radioactive pillar of furious turbulence and intense heat which will rise from the burst into the stratosphere. Some, possibly all, of the drones will be lost. But the scientific devices they carry will float, and can be picked up after the test.

CONFERENCE URGED

U.S. Senator Suggests Way To Re-establish Big Three Unity

WASHINGTON.—Senator Claude Pepper declared that "the United Nations Organization is not the way out of this web of fear"—that the Big Three must re-establish unity outside it through an unprecedented conference of their generals, workers, businessmen and statesmen.

The Florida democrat sharply assailed Senator Arthur Vandenberg (Rep., Mich.) as the leader of the "newest form of isolationism," exclusive American possession of the atomic bomb and military control of atomic energy.

Senator Pepper asserted that before entering the conference, the United States, with Britain and Canada, "should destroy every atomic bomb we have and smash every facility we possess" for making it.

NEW PROGRAMS

B.B.C. To Broadcast In Russian Language To Soviet Union

LONDON.—The British Broadcasting Corporation is preparing to beam three half-hour Russian-language programs daily to the Soviet Union. W. A. Burke, assistant postmaster general, said in the House of Commons.

Mr. Burke said the BBC "has not hitherto broadcast in Russian because the Soviet government impounded civilian receiving sets on the outbreak of the war between Germany and the U.S.S.R."

"The Soviet authorities (now) have lifted the wartime restrictions on listening in," he said.

HERE and THERE

CANADA ACHIEVES NATION HOOD

To those who have been sure that
Canada was an underling of Britain,
it may be a surprise to know that in
the eyes of the world she is a full
grown nation.

This acceptance by the world powers
has come since the war began.
As our industry developed to meet
huge demands for war materials, the
extent and quality of Canada's nat-
ional resources became known. So
vast and so extensive was this indus-
trial output that we are now not an
agricultural but an industrial nation.
This fact will influence foreign pol-
icy. We will be competing with other
nations for world markets, having
at the same time huge agricultural
surpluses to dispose of. Canada has
been drawn closer to the United States
by the war and they to us. Our
nations pooled their resources and
brains in a great joint war effort
without ever looking to see what
each could do. We have been equal
in all these efforts.

Prime Minister King has sat in
solemn deliberations with President
Roosevelt. Prime Minister Chamberlain
helped to decide war strategy.
Today as a respected member
of the U. N. O. she will sit

hope—direct the world into a settled
peace.

Our nickel and asbestos exports
give us a hearing among the big in-
dustrial nations who need these vital
materials. They are exports with
which we can bargain in the world
markets. The starving nations look
to us for food.

Today Canada rates ambassadors
in the important capitals of the
world including Great Britain. (We
call our representatives to empire
countries high commissioners). This
is a status which has only been ac-
corded us for the last two years. It is
the final step in achieving full nat-
ional recognition among the nations.

Canada's position on the great air
lanes of the world give her a voice
in setting up world air policy.
With the coming of nationhood
Canada must assume new responsi-
bility in maintaining peace and equi-
table living standards throughout the
world.

BRITISH SCHOOLBOY GUNMEN FIRE SOMETHING BIGGER TO SHOOT FOR.

By Major Steven Foot, D.S.O.

(The author of this article was one
of the pioneers in vocational guid-
ance in Britain).

It began with exam papers—quite
a help to have a look at them the
day before the exam. Then the gang
made some Cadet Corps equipment.
The success of that raid established

Robert as their leader.

Sten guns and Home Guard mail
forms came next. Then mail bags.
One of the gang shot a policeman,
another boy lost his nerve and shot
himself. The Headmaster had a con-
ference with the staff and some of
the parents. They found no solution.
A book changed a gang of toughs
into a group of patriots.

It was "Innocent Men", written by
Peter Howard (formerly political com-
munist for the Beaverbrook Press in
England, who has recently been in
the United States with Moral ReAr-
mament and lent by one of the tea-
chers to a shy, retiring boy, bottom
of the class and a sissy by Robert's
standards. But Robert could not help
being interested when Myrdhin jumped
18 places in class and secured a
place on the Junior Football team.
Robert wanted to know what had
happened to Myrdhin so he read "In-
nocent Men".

Just at this time the police were
hot on the trail of the gang, and
Robert was feeling pretty desperate.
He went to see Myrdhin to talk
things over. The result was a revolu-
tion in his life. Listening to God
started him on a program of com-
plete honesty to the police and putting
things right with the Headmaster
and Home Guard Commander. The
gang found a new kind of direction.
They also found real toughness.

Before long they were going into
action together telling youth clubs
about their new program. They 1-

terviewed mayors and talked about
juvenile delinquency. That wasn't
new: many people did that. But then
boys talked about the cure they had
found. Nobody had done that before.

During the holidays the gang went
to Scotland and helped distribution
of the patriotic handbook "Battle
Together for Britain". They visited
leading industrialists, miners, and
other Trade Union leaders, education
directors, Headmasters.

The President of the Educational
Institute of Scotland says of them:
"In all my years of experience a-
mong youth, I have never before
come across boys showing such ini-
tiative and taking responsibility for
the problems of the nation."

New Lunch Room at C. S. F.

The first tempting lunch was serv-
ed Wednesday at C. S. F.'s newly
installed Lunch Room. Irene Bowden
is in charge, with Evelyn Thompson
helping. The lunch will cost .25 and
is being wholeheartedly supported
by the employees.
Confectionery and light refresh-
ments will be included as supplies
become available.

THERE'S A SURPRISE
awaiting you if you haven't
yet tried delicious Maxwell
House Coffee. It's "Radi-
ant-Roasted" to develop
all the extra flavor in the
superb Maxwell House
blend.

OUR COMPLETE SHORT STORY—

Constant Reader

By PHIL GLANZER

Copyright
Wheeler Newspaper Syndicate

GERRY DOHERTY stood in the doorway of an automaton on the west side of Times Square and gazed steadily across the Palace. The theatrical trade sheets used to say that when you had played the Palace you had made Broadway.

Gerry felt funny inside as that thought flashed through his mind, his lips tightened as he remembered the night a few seasons back when he stood in this same doorway and thrilled at the sight of his own name in the electric lights of the Palace marquee.

His mind lagged. He leaned against the building and got to dreaming.

Two shows a day in those years, opening Monday matinee. He remembered how nervous he was on his first date at the house. Monday matinee was when all showfolk in productions on Broadway and every ace vaudeville performer who could make the date, dropped in to "catch" the show. Also there were agents who could snap up an act for a production or offer 40 to 50 weeks booking on another circuit.

Gerry, doing a single, had been assigned the toughest spot on the bill, No. 2 spot. And the heart jumped clear out of him when he heard his cue music on that Monday afternoon.

But his feet didn't go back on him, he gritted his teeth and at the first murmur of approval went into a routine that completely stopped the show. On Monday night he was moved to next to closing so that the show would not be stopped before the headliner came on.

The people from the subway circuit dawdled over their coffee and cake in Silver's, Thompson's, and the Automats, and told one another of a hooper who had come out of the west to stop a Palace show in the deuce spot.

TIRED? STIFF?

pat on

**SLOAN'S
LINIMENT
FOR FASTER RELIEF**

**MAKE LIFE WORTH LIVING!
WHY SUFFER?**

Do what countless numbers of happy users are doing for the effective relief of: Chronic Catarrhal conditions (as in Bronchitis, Asthma and Sinusitis), Skin disorders such as Boils and Pimples! Arthritic and Rheumatic Pains! Ask your druggist for Odorless and Tasteless ADAM'S GARLIC PEARLES, or write Richmond Adams Co., P.O. 374, Vancouver, Can. \$3 per 100 Pearles, enough for five weeks.

The people from the two-day dawdled over their coffee and tried to recollect if this hooper had ever played a bill with them anywhere. He was going up and he'd be a good guy to know. The Broadway columnists paragraphed about him and steered him into Silver's, or Lindy's or the Hollywood for a gagfest, Gerry Doherty had elicited!

It was only a few weeks later that he again played the Palace, strutting out in front as the big feature of a "flash production act," on at 9.45 at nights, 3.45 at matinee—billed big and headlining the show.

Even when the agents and the chiseling back-stage friends who knew him had got theirs each week he was still in the big money and it was inevitable, perhaps, that he should meet and fall in love with Gloria Templeton, one of Broadway's biggest stars.

He didn't know that syndicated columns turned out by the New York gossip columnists carried that news to little Irene Summer back in Madison, Wisconsin.

He didn't know that the kid who used to sit happily out front on amateur nights at The Happy Hour Theatre and the Starland and the Triangle and applaud his footlight starts, and tell him how wonderful he was later when they were walking down that silent tree-lined street, cried herself to sleep the night she read a flippant observation of Arthur Allison in the News-Review: "Gerry Doherty, whose dance review on the current Palace bill is tying the show in knots, and Gloria Templeton, star of 'Dusty Horizon' at the Belmont, are that way about each other."

Nor did he know, at that time, that hoopers and dramatic actresses make queer teams when fettered by matrimonial harness. But he knew later, and strangely enough, it had been Arthur Allison who informed him and the whole world with a brief line: "Gloria Templeton, Gerry Doherty's Ex, whose decree became final yesterday, and Raymond Tanner, heir to the Department Store millions, will tell it to a preacher before rent day."

Gerry's world had fallen from under him then. Talkies came in and vaudeville went out and hoopers, good and bad, came at a dime a dozen. From his apartment, which was located on Central Park West, he moved to a Times Square hotel. He kept that up as long as he could but with no bookings and little heart for work anyway, he had ended up in a theatrical rooming house over on 47th near 9th avenue.

That thought brought him out of his dreams. Two weeks in arrears on rent and 25 cents left to his name. A fine drizzle had set in and Gerry started across the Square toward Silver's Coffee and cakes and maybe a pal who had "touched" him when he was in the money.

At the 48th he waited for the flow of crosstown traffic. The lights flashed and Gerry stepped from the curb. As he did, a racing taxi, trying to beat the light, pulled up with a screech of brakes. The wet pavement was like ice to the rubber and the car skidded sideways. A girl screamed and things went black for Gerry.

Unknown to Gerry, Arthur Allison's column hit the streets that night with a line: "Gerry Doherty, once Broadway's ace hooper, is in Polyclinic's public ward—without funds. Perhaps some of his former pals would like to know." Broadway read that column, and let it be said for show business that three of his "former pals" kicked in. But a fourth former pal, who read the column three days later out in Madison, didn't kick in. She took the first train out for New York and a new light shone in her eyes.

Gerry cried when Irene walked in on him, but the columnists didn't know about that. The last they heard of Gerry was that he had married some dame from Madison, Wisconsin, and was running a cigar store out there. They didn't even bother printing it. Gerry wasn't news any more running a cigar store in Madison.

But because Arthur Allison is still read by Irene and Gerry it would be nice if someone would tip him off to mention in his column that "The Gerry Doherty's are tiny garment-shoppers!"

Cannot Go Alone

**Tourists Compelled To Take Guide
When Exploring Jasper Park**

It is a rule in Alberta's Jasper Park never to leave a man in the mountains alone. Fred Brewster, a pioneer Jasper guide and a Rocky Mountain oracle, lays down the law on this point.

No one has been lost yet, but with 6,785 square miles of forested parks and 11,000 foot peaks for tourists to explore, Alberta authorities take no chances. A veteran mountain man finds no terror in being alone in the wilds, but he knows the trick of caring for himself, and few tourists possess this knowledge.

WILL FLY HER OWN

A new civilian air base at Larder Lake, Ont., now is the centre of civilian flying operations helping to open up a vast new field of mining possibilities. Some prospectors fly their own machines. And, ready to back this last masculine stronghold is Miss Mary Ramsay of Kirkland Lake, who hopes to get her private pilot's licence soon.

Makes Young Mothers Smile!

**Modern Way Relieves Miseries
of Colds Pleasantly—During Night**

Today, the modern way most mothers use to relieve miseries of colds is to rub Vicks VapoRub on the throat, chest and back at bedtime. Results are so good because VapoRub...

Penetrates deep into cold-irritated bronchial tubes with its special, medicinal vapors.

Stimulates chest and back surfaces like a warming poultice.

Then For Hours VapoRub's special action keeps on working. Invites restful sleep. Often by morning most of the misery of the cold is gone!

Home-Proved by millions of users, VapoRub's special penetrating-stimulating action works just fine! So be sure you get the one and only VICKS VAPORUB.

Praised For Work

**Speech Therapist Is Helping Veterans
At Toronto Hospital**

It takes much patience and understanding to do Margaret McCurdy's work at Christie St. Hospital in Toronto. But the young Montreal-born speech therapist has won praise from both doctors and veterans alike for the help she has given aphasic patients at the hospital.

Miss McCurdy is the only speech therapist in Canada working for the Department of Veterans Affairs. In her "classroom" at Christie Street are some speechless veterans, some unable to read or write and a few who cannot understand speech.

A mirror plays an important part in her classroom. Standing before the mirror the patient sees how he forms his lips for words, guided by Miss McCurdy.

Twenty-four-year-old Tommy, a private in the 48th Highlanders, was knocked back into infancy when he was shot in the left side of the head during the fighting in Holland. Today thanks to Miss McCurdy he can speak again and is learning once more how to read and write.

SOMETHING NEEDED

**Motorists Would Welcome Car Better
Suited For Canadian Climate**

"Why don't some of the auto makers produce a model that's properly fitted for a climate like Canada's?"

We had often wondered the same thing, but not until a prominent engineer let loose the above lament the other day have we dared mention it.

It was pointed out that the car makers have never hesitated about adding to the number of models but that not one of all the seeds of models was ever tailored particularly to a climate like Canada's.

Here are some of the items suggested by the engineer: A different cooling system to get rid of split radiators and the long bother of anti-freeze.

Why not better interior heating systems—built-in and "engineered-in" heaters; defrosting and windshield wiping systems that do a complete job and wipers that will wash off mud. There could be better insulation of the body and better protection of running gear, brakes, etc., against water, ice, grit, etc. Trunk and door design that won't hold water, hence freeze up tight, is another of our engineer's requests.

All this, says our informant, would add little to cost and, he thinks, would find many eager Canadian buyers who get pretty tired of the winter pumpering their present "hot weather" models require.

Since the motor men are getting this suggestion we add another free: Some car designer is going to endear himself to millions when he turns out an interior that can be kept clean—not spotless, not necessarily tidy as a drawing room—just a little cleaner than a pig-sty.

Present car interiors may be all right for the folk with chauffeurs and for those who can or will spend part of every day wiping and brushing and rooting into the almost-impossible-to-get-at places inside the body.

But the rest of us will have garlands of purchase orders for the designers who do something for the driver, who, most of the time, does his own automobile "house-work."—Financial Post, Toronto.

GARDEN

NOES

Showy Flowers

An amazing showing can be made with a few annual flowers. Cosmos, giant marigolds, zinnias, petunias, portulaca, nicotina, calendula, alyssum, nasturtiums, etc., are easily grown almost anywhere in Canada. Some of the larger flowers can actually be used in place of shrubs. Seeds should be started early and in finely prepared soil. Plants are transplanted to permanent quarters when they are well established with several sets of leaves. Ready started bedding plants can be bought. For lucky growth, cosmos, gladiolus, dahlias, giant marigolds and zinnias should have about two feet each way—petunias need about a foot apart.

The Handy Plot

The old-fashioned kitchen garden had a lot to recommend it. This is the small plot of ground, perhaps only 20 feet square, right at the door. In this position it is handy, especially when one wants to get a few onions or lettuce in a hurry, and it is an amazing thing how much produce one can grow in such a space.

As a matter of fact, for the average smaller gardener it is best to grow beans, lettuce, radish, carrots, etc., in rows close together in a kitchen garden of this kind rather than in longer rows out in the main garden. The latter, of course, is used for big, bulky crops like corn, potatoes and peas and possibly the main crops of beans, but the heavily planted, often cultivated kitchen plot near the house is an ideal location for the other stuff. Located close to the house one can often spend odd minutes in cultivating and weeding when it would not be practical to make a trip out into the big garden. Whenever possible this kitchen garden should be located where it can be watered in very dry weather.

Not Too Soon

There is always one spot in the garden which dries up first in the spring and here, if one wants to make the earliest start possible, is where first vegetables or flowers should be planted. But it is most important, the experts warn, that the soil be really fit to work. If it is muddy then it isn't ready and there is nothing to be gained if digging or plowing is done too soon. Heavy soils especially if cultivated while still wet will bake into hard muds and it may take weeks or even months of hard, back-breaking digging to break them up fine again.

A good test to make sure that the soil is ready is simply to walk over the ground where one plans to plant. If the soil muddies the boots then it is too wet, if it shakes off readily or if it crumbles when squeezed in the hands and does not compact into a ball, then it is fit to work.

Experienced gardeners advise cultivating as thoroughly as possible before planting. The reason they emphasize this early digging, especially in ground that has not been cultivated every year for some time, is to get rid of twine grass and other weeds. It is much easier to clean these pests out by the roots before the rows are planted and there is plenty of room to operate.

Surfaces which reflect none of the sun's rays appear black. Surfaces which reflect all of the sun's light rays appear white.

MACDONALD'S BRIER

Canada's Standard Smoke

CANADIAN CURLING SUPREMACY

THE MACDONALD BRIER TANKARD WON BY
SEDEGWICK, ALBERTA, CURLERS

THE SEDGEWICK FOUR—Left to right: Austin R. Smith, second; Bartley Swelin of Hughenden, third; Billy Rose, skip; George Crooks, lead.

A veteran Alberta four skipped by Billy Rose won the Macdonald's Brier Tankard, emblematic of Canadian curling supremacy, by besting a stubborn northern Ontario rink from Kirkland Lake 8-6 in as thrilling a match as the rearing game has seen in many a "spiel."

In posting Alberta's fourth victory in 17 years of Brier bonspiel play, Rose and his men of Sedgewick—George Crooks lead, Austin Smith second and Bartley Swelin third—took the hard road.

They wound up in the regular nine-game round robin play with seven victories and two defeats—enough to put them in a tie with the highly-favored Manitoba champions and northern Ontario for first place. They barely edged out Ontario 10-9 for the seventh win.

But the Alberta champions—three of them come from the little community of Sedgewick with a population of 500 and Swelin from the nearby village of Hughenden—drew on courage and the 15 years' curling experience each of them had when the play-offs came up.

Displaying the most perfect curling of the bonspiel, they eliminated Manitoba 8-7 in the semi-final—revenge for one of their two defeats in regular play—and then triumphed in the final. With uncanny repetition Rose in those two games played knockout and draw shots dead on time after time.

Tommy Ramsay's Kirkland Lake quartette went into the 11th end on even terms with the Alberta representatives. The rinks had posted no score higher than a two and a few of those up to that point.

But on the 11th Rose almost made sure of his championship. He had six in the house when Ramsay's last stone drew in to better five of them and leave him with only a single.

The last end was just as tense.

The first golf balls were made of leather and stuffed with feathers.

"Have a care Jack Dalton! Unhand that package of crisp, crunchy, delicious Grape-Nuts Flakes!"

"Curses! Foiled again! Every time I try to make off with some malty-rich, honey-golden Post's Grape-Nuts Flakes I'm stopped by this guy Curly Crisp!"

"And why not? That's a neat package you've got there. Those Grape-Nuts Flakes supply carbohydrates for energy; proteins for muscle; phosphorus for teeth and bones; iron for the blood; other food essentials."

"But these are no ordinary flakes! They're made of two grains—wheat and malted barley. And skilfully blended, baked and toasted for crispness, tempting taste and easy digestion."

"Hand over that giant economy package, villain. I'm a bit wolfish myself, when it comes to Grape-Nuts Flakes!"

Revere Ware ON DISPLAY

Just received... a display assortment of the Cooking Utensils you have been waiting for... famous Revere Ware.

These time-proven utensils are stainless steel for longer life and easier cleaning with heavy copper bottoms that heat quickly and evenly. They are ideal for "waterless" cooking. Stop in soon and see how truly superior these utensils are. We'll tell you how to get them.

RENEWAL OF UNEMPLOYMENT INSURANCE BOOKS

To All Employers:

All Unemployment Insurance Books for the year ending March 31st, 1946, must be exchanged for new books.

New Insurance Books for the fiscal year 1946-47 will be exchanged by the Local National Employment Office in your area for expired Insurance Books.

Protect the benefit rights of your employees by sending in their expired books properly completed on March 31st.

There are severe penalties for failing to make Unemployment Insurance contributions for your insured employees and for failure to renew the Insurance Books as required.

UNEMPLOYMENT INSURANCE COMMISSION

Award Contracts for 117 Miles of Road Work

Road contracts for main highways construction involving an outlay of more than \$700,000 were awarded last week by the public works department of Alberta.

The contracts cover a total of 117 miles, of which 73 miles will be hard surfacing, according to information received by the Alberta Motor Association.

One contract is for hard surfacing 44 miles of the Trans-Canada highway between Cochrane, west of Calgary and the East gate of Banff national park. Another is for the 31 miles from Calgary to High River.

Both projects are to be completed by July 1st well before the holiday motor tourist season reaches its peak.

The provincial authorities also have awarded contracts for grading between Standoff and Macleod and for completion of work on the Jasper highway east of Edmonton, in the Minburn and Vermilion areas.

This year's program also will include construction of a new highway bridge at Red Deer. The capital estimates this year include \$200,000 for new highway bridges.

Mr. and Mrs. Owen Leavitt and family and Mrs. Loran Nelson were overnight guests of Mr. and Mrs. C. A. Layne. Mr. and Mrs. Leavitt were paying a farewell visit as they are leaving to establish a home in the U. S. Mrs. Leavitt and Mrs. Nelson are sisters of Mrs. Layne.

L. D. King was a Calgary visitor on business the first part of the week.
